Chapter 1 Interface connection

1.1 Front panel

Key Description		
No.	Key	Description
1	Switch	AC power input switch
2	LCD screen	Display menu, screen parameters and other information, used

		for debug device
3	IR receiver	Switch signal source, brightness setting, volume adjustment and other functions
4	SOURCE	Input Source Select keypad, 4 input source port selection buttons, corresponding to the input interface identification on the back panel.
5	FUNCTION	Function keys, the key multiplexing function is digital selection, generally used when setting the resolution. BLACK: when you press BLACK and its indicator will be on, the output screen will be in a black state. BRIGHT: Quickly swap out the shortcut keys of the brightness adjustment menu. MODE: Quickly pop up the preset mode call menu.

		PXP: Quickly enter the dual picture layout menu FREEZE: Shortcut key for screen freeze. LOCK: Quickly lock the keys to prevent miss operation.
6	WIN	[WIN1]- [WIN3] Button: You can press it to add 1~2 window display, and its indicator means the currently selected window.
7	MENU	Short press the knob [OK] key: it means to enter the main menu or input confirmation. Turn the knob clockwise to increase or the next option, counterclockwise to decrease or the previous option. GUIDE: can quickly switch out the "smart navigation" setting interface. Return key ESC: means to exit the current operation or option.

1.2 Rear Panel

Input interface			
No.	Name	quantity	Description
2	HDMI	2	HDMI input interface Interface form: HDMI-A Signal standard: HDMI 1.3 backward compatible Resolution: VESA standard, $\leq 1920 \times 1080 @ 60\text{Hz}$

			Support audio input
	DVI	1	Interface form: DVI-I socket Signal standard: DVI1.0 Resolution: VESA standard, PC to 1920x1200, HD to 1080p
	SDI	1	Interface form: BNC Signal standard: SD-SDI,HD-SDI,3G-SDI Resolution: VESA standard, ≤1920x1080@60Hz
3	AUDIO IN	1	TRS 3.5mm audio input
6	Power	1	AC power interface 100-240V, 50/60Hz

Output interface			
No.	Name	quantity	Description

1	LAN output	6	Gigabit Ethernet port Transmission speed 1Gbps, used for cascading receiving cards, transmitting RGB data stream. One Gigabit Ethernet port support loading capacity 655,360 pixels.
3	AUDIO OUT	1	TRS 3.5mm dual channel audio output port Connect audio power amplifier for high-power audio external amplifier

Control interface			
No.	Name	quantity	Description
4	USB-B	1	Connect to the PC, used for debug LED controller

	RS232		Connect central control equipment for centralized control
5	Wi-Fi	1	Connect to Wi-Fi antenna to enhance wireless signal

1.3 Hardware connection

Chapter 2 HDSet installation

Please download the installation package of HDSet software from Huidu's official website www.huidu.cn, and complete the installation according to the diagrams below:

1.Run the software package,then select language for installer. Click [OK] to go on.

2. After selecting a language, an installation wizard like below will appear. Click [Next].

Choose the installation location, click [Browse] to change the default target location, then click [Install] after completing;

After the installation is complete, you are ready to use HDSet.

Chapter 3 HD-VP830 Parameter settings

3.1 Connection

Connect the VP630 to the computer by USB-B type cable.

3.2 Screen Configuration

1. Run HDset software, then select device and process, click [Screen Configuration].

2. you can debug receiving cards.

Chapter 4 HD-VP830 Product Operation

4.1 Interface Description

1. Input source for Windows, input resolution and refresh rate.
2. LED Network port, display the number of network ports currently in use.
3. Output resolution, output to screen resolution.
4. Brightness, Volume, the screen brightness, you can adjust the brightness by the following steps.

5. Button unlock, Lock the button by pressing "LOCK".
6. Input source, display the number of input interface currently in use.

4.2 Input source switching

The HD-VP620 supports simultaneous access to five signal sources, and can switch to the input source that needs to be played at any time as required. You can quickly switch by pressing the key in the "SOURCE" area of the front panel.

4.3 Net

4.3.1 Output

Output settings are used to set the coordinates and range of the network port.

Horizontal width: 64—the width of the LED screen;

Vertical height: 64—the height of the LED screen;

X: Horizontal start: setting parameter range = LED screen width-horizontal width;

Y: Vertical start: setting parameter range = LED screen height-vertical height;

4.3.2 Input setting

The connection relationship is set as the connection relationship processing of the receiving card. Currently, only standard general mode is supported, and complex connection relationships are not supported.

4.4 Screen layout

The screen switch setting of screen 1 cannot be set to off.

Horizontal starting value + horizontal width cannot exceed the width of the LED screen.

The vertical starting value + vertical width cannot exceed the height of the LED screen.

4.5 Effect

Brightness: 0-100 default 50

Sharpness: 0-10, default 5

Contrast: 0-100, default 100

Saturation: 0-100, default 50

Color temperature: warmer, natural, colder, customize. Default: Warmer

4.6 Capture

When the intercept switch is off, the knob cannot select the intercept width, height, horizontal, and vertical start.

Intercept width: 10808—Maximum width of input source

Intercept height:640—Maximum height of input source

X: Horizontal start: horizontal start value range = input source width-interception width

Y: Vertical start: vertical start value range = input source width-interception width.

Note: If the size of the captured screen is the same as the screen size, it will be displayed point-to-point. If

the size of the captured screen is different from the screen size, it will be displayed by zooming.

4.7 Template setting

You can save up to 8 templates. '★' mean this teamplate is already occupied.

Existing templates support replacement, deletion, and loading non-existent template option, supports saving up to 8 template files

4.8 Settings

4.8.1 Input resolution

Supports three sets of general resolutions and supports custom resolution settings.

The default is 60Hz.

4.8.2 Other setting

Support turning on and off the sound, and volume adjustment.

Support turning on and off the WiFi.

4.8.3 Test chart

Support testing the color display.

4.8.4 Key lock

The key lock, the maximum support time is 3600 seconds, the key lock is automatically locked after the set time, except that the key lock button functions normally, other buttons are locked, and the function does not work, the button of “LOCK” will light up, you can press the “LOCK” button to unlock.

4.8.5 Factory setting

1. Language

Language selection: support English, Chinese.

2. Factory reset

Restore the device to factory settings.

3. Firmware version

Check the device's MCU, DSP ,FPGA and Wi-Fi version.
